plantmate™

500g net

plantmate™ foliar

Instructions for use

Ensure the mixing tank has been thoroughly washed to remove any chemical residues before mixing plantmate foliar with fresh clean water. Always pre-mix plantmate foliar by adding the powder to water at the minimum rate of 500g to 10 litres. Mix well and allow to stand for 5 minutes before adding to the dispensing tank, which should contain a maximum of 500 litres.

Ensure the dispensing tank is agitated continuously during application. Do not mix plantmate foliar with chemicals. Ensure all liquid is applied on the same day it is mixed into suspension. Plantmate foliar may be applied with liquid foliar nutrients and organic products such as seaweed extracts and fish based products. Plantmate foliar should be applied in the late afternoon with a wetter/sticker.

Field crops

Apply plantmate foliar at the minimum rate of 500g per hectare. Apply every 14–28 days through the crop cycle dependent upon climate, growing conditions and crop stress.

Nursery and Indoor crops

Apply plantmate foliar at the minimum rate of 100g per 100 litres of spray. Apply every 7–14 days through the crop cycle dependent upon climate, growing conditions and crop stress.

Orchards and vineyards

Apply plantmate foliar at the minimum rate of 500g per hectare from flowering through to pre-harvest. Apply every month. Additional applications may be made through the crop cycle dependent upon climate, growing conditions and crop stress.

Precautions for use

- Keep out of reach of children
- Store refrigerated at 4°C
- To avoid airborne particles wear mask when dispensing product
- Wash hands and exposed skin after use and before meals
- Crush the empty sachet and bury in approved landfill
- Do not contaminate water supply with material or the empty pack
