**Trichodry**
NURSERY

Trichodry Nursery is a flake formulation scientifically constructed with proprietary natural strains of Trichoderma in a nutrient promoter matrix. Trichodry Nursery is designed to be blended into growing media where it will establish a strong beneficial bio-inoculant population. This enhanced bio-activity stimulates root initiation and vigorous root growth and increases the assimilation and utilisation of micro-nutrients to give the plants a faster start with more resistance to adverse conditions.

INSTRUCTIONS FOR USE

Blend 1kg of Trichodry Nursery Flake into 1 cubic metre of growing media. Trichodry Nursery should be blended with the growing media before tray or pot filling. The Trichodry Nursery flake must be well mixed with the growing media to ensure uniform dispersion before tray filling.

PRECAUTIONS FOR USE

- Keep out of reach of children
- Store refrigerated at 4°C
- To avoid airborne particles wear mask when dispensing product
- Wash hands and exposed skin after use and before meals
- Crush empty sachet and bury in approved landfill
- Do not contaminate water supply with material or the empty pack

EXCLUSION OF LIABILITY

The manner of use of this product is beyond the control of Agrimm Technologies Ltd and the distributor and is subject to environmental factors. Except to the extent that the exclusion or denial of liability is prohibited under any relevant legislation the company expressly excludes any warranty as to the quality or fitness of any goods sold for any purpose whatsoever and deny all responsibility in contract tort negligence or otherwise for any harm or damage resulting from the use of such goods or from acting on the advice or recommendations as to such use given in good faith by any representative of the company or the distributor.
