granular

Instructions for use

Field crops

Apply plantmate granular at the rate of 10–25 kg per hectare by direct application to the planting furrow. If the seed is of similar size to the plantmate granule the seed may be mixed with the plantmate granule in the planter box. Alternatively plantmate granular should be applied to the furrow at the same depth as the seed from a separate Gandy box attached to the drill.

Flower bulbs & tubers

Apply plantmate granular at the rate of 1kg per 100 square metres directly around bulbs and tubers at planting. Ensure the granules are well covered with soil.

Seed beds

Apply plantmate granular at the rate of 1kg per 20 square metres and mix into the top 5cm. of profile when preparing seed beds. Ensure the granules are well covered with soil/media.

Orchards and vineyards

Apply plantmate granular to the bottom of the planting hole for new plantings of trees and vines. Apply at the rate of 5–25g depending upon the size of the rootball and planting hole.

Turf

Reconstructions & New Sod

Apply plantmate granular at the rate of 2–5 kg per 100 square metres and mix into the top 5 cm of profile. Ensure the granules are well covered with soil/sand.

Precautions for use

- Keep out of reach of children
- Store refrigerated at 4° C
- To avoid airborne particles wear mask when dispensing product
- Wash hands and exposed skin after use and before meals
- Crush the empty sachet and bury in approved landfill
- Do not contaminate water supply with material or the empty pack
